

RTS 28 for Jan-Dec 2018- Instinet Europe Limited

Overall Summary:

For a detailed description of execution arrangements used by Instinet Europe Limited ('Instinet'), see our Order Execution Policy:

<http://www.instinnet.com/legal-and-regulatory.php>

This document shows Instinet's top five venues and brokers for each class of instrument, along with summaries for each class.

Regarding the specific clauses a-h of Article 3 (3) of RTS 28, the following information is common to all classes of financial instruments traded by Instinet:

<p>(a) an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution;</p>	<p>When selecting venues on which to place orders, Instinet generally puts the greatest emphasis on price above other factors, followed by likelihood of execution.</p> <p>Instinet has established a set of processes and procedures to monitor execution quality. The Best Execution Committee undertakes regular reviews, usually on a quarterly basis, to scrutinize the performance of Instinet's execution mechanisms. The Best Execution Working Group meets frequently, usually weekly, to assess order execution and discuss enhancements.</p> <p>When assessing the executions, Instinet's Best Execution Committee and Working Group use quantitative and qualitative metrics to assess venues and brokers, and also reviews performance of the SOR, the Experts algorithm suite, and orders worked by Instinet's Execution desk.</p> <p>Metrics used include analysis of spread moves at time intervals after fills on different venues, comparison of prices achieved by the SOR with the consolidated lit orderbook at the time of sending, and performance of algos against a range of benchmarks including arrival, close and VWAP.</p>
<p>(b) a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;</p>	<p>Instinet may use the execution venues listed in the Appendices to the Order Execution Policy when obtaining best execution. Instinet is wholly owned by Nomura Holdings Inc and as such has close links with other legal entities within the Nomura Holdings Inc Group.</p> <p>Where Instinet routes a qualifying order to an affiliate for execution, Instinet will ensure that the latter will have regard for the wider market in the relevant security, taking into account information source reasonably available, including but not limited to exchanges, brokers/dealers and multi-lateral trading facilities in order for Instinet to meet its best execution obligation.</p> <p>Instinet owns and operates BlockMatch MTF. The rulebook and membership details for BlockMatch are available on www.blockmatch.com</p> <p>Instinet is a member of the Plato Partnership which is part of a joint venture with Turquoise, an MTF operator.</p>
<p>(c) a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;</p>	<p>Instinet has no specific arrangements with any execution venues other than the standard terms of membership where applicable. When trading with a Systematic Internaliser, no payment is made or received.</p>

<p>(d) an explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;</p>	<p>In 2018 the following EEA venues were added, in response to the changing liquidity landscape that followed MiFID II legislation coming into force.</p> <p><u>Periodic auctions:</u> CBOE Periodic Auction, Nasdaq Auction on Demand, Sigma X MTF, Turquoise Lit Auctions, Posit Auction.</p> <p>These venues are accessed by default by Instinet's dark-seeking algorithm Nighthawk, and are assessed as part of the review process mentioned in section (a) above. These interactions prioritise price and likelihood of execution.</p> <p><u>Systematic Internalisers:</u> Citadel Connect Europe, Hudson River trading, IMC, Jane Street Financial, Jump Liquidity, SSW, Tower Research, Virtu Financial, XTX Markets.</p> <p>These SIs are accessed by default by Instinet's SOR when trading aggressively, where they offer a visible quote that is capable of filling the full slice. The feeds they provide are frequently assessed using objective scoring criteria, and any that do not meet defined thresholds are suspended from the default interaction list. These interactions prioritise price, likelihood of execution, and cost.</p> <p><u>Request for Quote:</u> BlockMatch RFQ.</p> <p>BlockMatch RFQ supports equity requests-for-quotes, which are bilateral and executable exclusively by the requestor. Instinet's SOR may send Immediate-or-Cancel RFQs when trading aggressively, and Instinet's Nighthawk algorithm may send both quotes and RFQs. These interactions are assessed as part of the review process mentioned in section (a) above, and prioritise price, likelihood of execution, and cost.</p>
<p>(e) an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;</p>	<p>Instinet deals only with professional clients and eligible counterparties and otherwise does not categorise clients. However we classify orders according to the product used: DEA orders, transmitted orders, SOR orders, Experts algorithm orders, and worked orders. Descriptions of each of these order categories and their execution arrangements can be found in our Order Execution Policy.</p>
<p>(f) an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;</p>	<p>Instinet does not have any retail clients.</p>
<p>(g) an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under RTS 27:</p>	<p>Instinet's Best Execution Committee and Working Group assess execution quality using a variety of metrics depending on the order type, as described under answer (a) above.</p> <p>Instinet sources raw data directly from exchanges in most cases and maintains its own tick database. In the few EEA markets where Instinet is not a member firm this data is sourced from Bloomberg.</p>
<p>(h) where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.</p>	<p>Instinet uses consolidated data stored in a proprietary database.</p>

Many non-EEA securities are admitted to trading in the EEA and hence are classified as MiFID securities.

Where the most liquid market for a security is outside the EEA, Instinet may execute on that market, subject to the Share Trading Obligation, in order to meet Best Execution requirements.

In some cases information relating to passive and aggressive orders is missing, including for venues that do not publish Last Liquidity information.

To assist clients in understanding where their orders are routed, we have included the following additional tables and summaries, filtered on securities listed on EEA venues only.

Top 5 Venues: Small caps, EEA Listings only						
Class of Instrument		Equities - Shares and Depository Receipts: Tick size liquidity bands 1 and 2				
Notification if <1 average trade per business day in the previous year		No				
Top five execution venues ranked in terms of traded volumes (descending order)	MIC	Proportion of volume traded as a percentage of total in that class	Proportion of orders executed as a percentage of total in that class	Percentage of passive orders	Percentage of aggressive orders	Percentage of directed orders
XETRA	XETR	18.4%	8.1%	54%	42%	58%
EURONEXT - EURONEXT BRUSSELS	XBRU	14.6%	9.1%	34%	59%	70%
LONDON STOCK EXCHANGE	XLON	6.9%	9.7%	50%	27%	68%

EURONEXT - EURONEXT PARIS	XPAR	4.5%	8.9%	50%	42%	53%

When limiting data to EEA listings only, the top 5 venues are no longer dominated by emerging markets and Switzerland.

BlockMatch RFQ is particularly suited to small-cap trading, as it allows counterparties to trade large blocks on exchange, hence the very high volume-to-executions ratio.

Auction trading represents the remaining percentage after passive and aggressive orders; these are typically much larger size than continuous orders.

Instinet is a member of most major European exchanges except Bolsa de Madrid, hence the overall percentage of flow routed to brokers is very low.

ITG and Liquidnet are used as DEA brokers when accessing their MTFs, ITG POSIT and Liquidnet Blocks.

Santander is used as a DEA broker to access Bolsa de Madrid.

Certain Instinet clients direct orders to Morgan Stanley.

Winterflood Securities is used as a broker for UK small caps.

EURONEXT - EURONEXT PARIS	XPAR	8.1%	5.3%	44%	43%	68%

When limiting data to EEA listings only, Xetra moves ahead of BXE due to the effect of filtering out trades in Swiss-listed securities.

A high percentage of Instinet's executions in this category were from directed orders, highlighting Instinet's position as a DEA broker and connectivity provider.

Instinet's algos and DEA clients typically place more passive orders than aggressive orders; this is especially the case on MTFs.

The volume-to-executions ratio on Regulated Markets is much higher than on MTFs, mainly due to high-value auction trades.

Many non-EEA securities are admitted to trading in the EEA and hence are classified as MiFID securities.

Where the most liquid market for a security is outside the EEA, Instinet may execute on that market, subject to the Share Trading Obligation, in order to meet Best Execution requirements.

In some cases information relating to passive and aggressive orders is missing, including for venues that do not publish Last Liquidity information.

To assist clients in understanding where their orders are routed, we have included the following additional tables and summaries, filtered on securities listed on EEA venues only.
